

TAKE THE FAST TRACK TO MARKET WITH MISSION CRITICAL SYSTEMS

REDUCE TIME TO MARKET WITH RUGGEDIZED, COTS PRODUCTS

We are the experts in SWaP optimization and ruggedization so why not leverage decades of design and development experience to bring your product to market faster?

CUT YEARS FROM THE DEVELOPMENT PROCESS

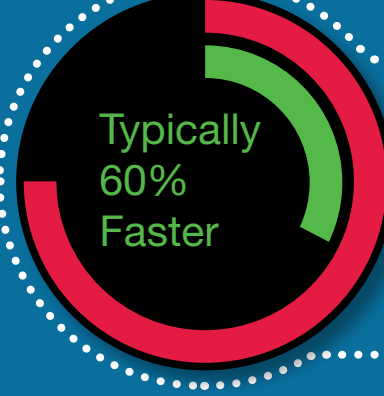

Based on the combination of agile principles, concurrent engineering, and existing technology, Curtiss-Wright can significantly reduce development time compared to traditional sequential development. Leveraging Curtiss-Wright commercial off-the-shelf (COTS) products can save additional time, in comparison to designing from scratch.

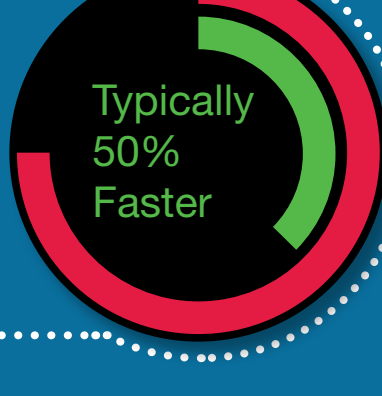

LEVERAGE OUR DECADES OF DEFENSE INDUSTRY SYSTEM DESIGN AND DEVELOPMENT EXPERIENCE

Curtiss-Wright has taken the Product Development journey so you don't have to.

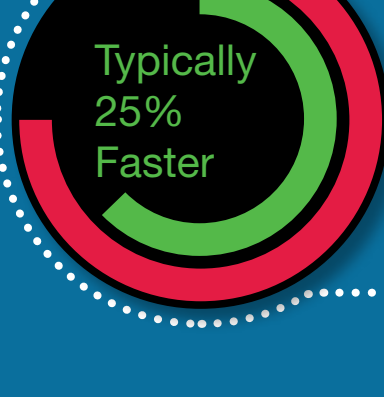

CURTISS-WRIGHT STARTS HERE

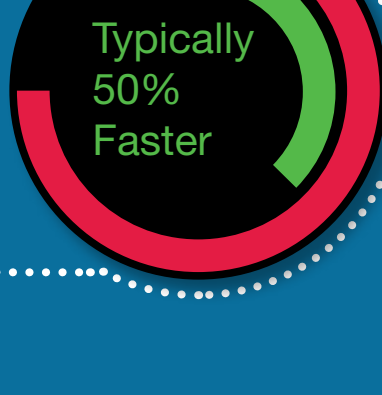

Stage 1
Requirements definition

Stage 2
Product development to specifications

Stage 3
Qualification to agreed standards

Stage 4
Product delivery and subsystem integration

*Time savings are dependent on supply chain

Stage 5
Market ready product

YOU START HERE!

Purchase COTS or Modified COTS Product

MOVE RIGHT TO SYSTEM INTEGRATION

Curtiss-Wright can deliver systems that meet your customers requirements, enabling you to move directly to sales and system integration.

ACCELERATE TIME-TO-MARKET

- Deploy market ready solutions by leveraging our agile development process and decades of experience

LOWER COSTS

- Avoid creeping program costs with a fixed subcontractor contract that has a defined output and timely delivery.

REDUCE RISKS

- Agree to a fixed schedule and output and let your subcontractor/vendor take the development risks.

FOCUS ON YOUR CORE COMPETENCIES

- Allow us to do what we do best while you focus on what you do best

Manufacture and Design

Software Engineering

Electrical Engineering

Mechanical Engineering

Integration and Test Engineering
