Curtiss-Wright Selected to Deliver MOSA Networking and Safety Certifiable Processing and Graphics Solutions for Aircraft Upgrade Program

Rugged COTS processing and graphics display modules provided with AC 20-152A safety certification artifacts that support system certification up to DAL -A

ASHBURN, Va. – January 31, 2023 – Curtiss-Wright's [Defense Solutions division](#), a leading supplier of Modular Open Systems Approach (MOSA) solutions engineered for success, today announced that it was selected by a leading system integrator to provide open standards-based safety certifiable processing and graphics technology, as well as its switching technology for use in a military aircraft upgrade program. Under the contract, Curtiss-Wright will provide the customer with its award winning¹ [V3-1708 single board computer](#) and [V3-717 graphics display module](#). Both of these commercial-off-the-shelf (COTS) rugged 3U OpenVPX™ form factor modules are provided with AC 20-152A Development Assurance for Airborne Electronic Hardware safety certification artifacts that support system certification up to DAL-A. Curtiss-Wright's solution exceeds the MIL-HDBK-516C Airworthiness Certification Criteria of this program. Curtiss-Wright will also provide its VPX3-663 3U OpenVPX Ethernet switch module. The initial contract is valued at \$2.6 million. The lifetime value of the contract is estimated at \$14.5 million.

"We are proud to have been selected to provide our MOSA-based safety certifiable processing and graphics technology for use on this military aircraft upgrade program," said Chris Wiltsey, Senior Vice President and General Manager, Curtiss-Wright Defense Solutions. "With the changing operational needs for both new and upgraded platforms and systems, the combination of COTS and safety certifiable solutions for airborne

This press release contains forward-looking statements made pursuant to the Safe Harbor provisions of the Private Securities Litigation Reform Act of 1995. Such statements, including statements relating to Curtiss-Wright's expectations of a continued relationship with an existing customer, the continued funding and success of this aerospace defense program, the performance of its products in this program, the long term value of this contract, and the future opportunities associated with this technology, are not considered historical facts and are considered forward-looking statements under the federal securities laws. Such forward-looking statements are subject to certain risks and uncertainties that could cause actual results to differ materially from those expressed or implied. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date hereof. Such risks and uncertainties include, but are not limited to: a reduction in anticipated orders; an economic downturn; changes in competitive marketplace and/or customer requirements; a change in US and Foreign government spending; an inability to perform customer contracts at anticipated cost levels; and other factors that generally affect the business of aerospace, defense contracting, marine, electronics and industrial companies. We expressly disclaim any current intention to update publicly any forward-looking statement after the distribution of this release, whether as a result of new information, future events, changes in assumptions or otherwise. Please refer to the Company's current SEC filings under the Securities Exchange Act of 1934, as amended, for further information.
