

BRING NEW STABILITY TO PAYLOADS IN MOTION

Stabilize the movements of payloads on the ground and in the air with rugged, high-precision, and scalable motion control systems from the Drive Technology division of Curtiss-Wright Defense Solutions.

GET EXACTLY WHAT YOU NEED

Deploy highly reliable, purpose-built motion control systems on spec, on time, and on budget. Our fully integrated motion control systems are tailored for your unique requirements.

TO ACCELERATE TIME TO MARKET

Use our building-block approach and advanced processes to jump-start system development and reduce risks. Our motion control systems leverage a modular suite of rugged and field-proven components.

AND STABILIZE ALMOST ANY PAYLOAD

Tackle your toughest motion control challenges with motion control systems that can be adapted and configured for almost any application.

IN ANY ENVIRONMENT

Take high-precision motion control to the harshest environments. We thoroughly test every component in every system to ensure it performs reliably and accurately in the most severe conditions.

WITH COMPLETE CONFIDENCE

Rely on a trusted, proven leader in high-precision motion control systems. Curtiss-Wright Drive Technology.

**TRUSTED
PROVEN
LEADER**
