GA-ASI Honors Curtiss-Wright Defense Solutions as a Supplier of the Year

Curtiss-Wright Defense Solutions receives special recognition for outstanding quality and delivery performance

Ashburn, Va. – May 23, 2019 – Curtiss-Wright’s Defense Solutions division, a trusted leading supplier of rugged commercial off-the-shelf (COTS) embedded processing technology, today announced that it received a Supplier of the Year Award from [General Atomics Aeronautical Systems, Inc. \(GA-ASI\)](#), a leading manufacturer of Remotely Piloted Aircraft (RPA) systems, tactical reconnaissance radars, and electro-optic and related mission systems solutions. The award, which recognizes outstanding quality and delivery performance, was announced at GA-ASI’s annual Supplier Performance Awards on April 29, 2019. GA-ASI presents its Supplier of the Year Award to companies achieving 100% quality and on-time delivery performance for calendar year 2018.

“We are exceptionally proud to receive special recognition as Supplier of the Year by General Atomics Aeronautical Systems,” said Lynn Bamford, Senior Vice President and General Manager, Defense Solutions division. “We believe that this highly coveted honor results from our ongoing commitment to provide GA-ASI with the highest level of support as we collaborate to provide them with our rugged COTS-based processing module technology and further our record of excellent on-time delivery and high quality.”

“GA-ASI’s success is based largely on our highly skilled and dependable supply chain,” said David R. Alexander, president, GA-ASI. “Our suppliers are companies that are committed to sustaining GA-ASI and our line of life-saving, highly reliable RPA for customers throughout the world. We’d like to thank all our suppliers for their dedicated service and commitment to excellence.”

About GA-ASI

General Atomics Aeronautical Systems, Inc. (GA-ASI), an affiliate of General Atomics, is the leading designer and manufacturer of proven, reliable Remotely Piloted Aircraft (RPA) systems, radars, and electro-optic and related mission systems, including the Predator® RPA series and the Lynx® Multi-mode Radar. With more than five million flight hours, GA-ASI provides long-endurance, mission-capable aircraft with integrated sensor and data link systems required to deliver persistent flight that enables situational awareness and rapid strike. The company also produces a variety of ground control stations and sensor control/image analysis software, offers pilot training and support services, and develops meta-material antennas.
