CURTISS-WRIGHT

Elevate Performance
With Interoperable Solutions for Demanding ISR Systems

A leading supplier of rugged commercial off-the-shelf VPX modules and subsystems

Proven products designed for the most complex Intelligence, Surveillance, Reconnaissance (ISR) systems

TRUSTED PROVEN LEADER

Trusted on hundreds of platforms on land, air, and sea

DSPs in 3U and 6U form factors

Custom Configurations

FPGAs and GPGPUs available in 3U/6U/XMC form factors

Multi-core CPU DSP for **optimal processing power and control** of GPGPU and FPGA processors.

Digital Signal Processor

Field Programmable Gate Array

General Purpose Graphics Processing Unit

OpenHPEC™ Accelerator Suite

FPGA for **efficient** front end sensor processing

GPGPU **accelerates** demanding algorithms

Military & Aerospace Innovators Awards PLATINUM HONOREES

Award-winning system software toolkit for simplifying development and optimizing performance

Maximize productivity, improve code performance, decrease risk, and keep critical projects on schedule and on budget.
