CURTISS-WRIGHT ACQUIRES PARVUS CORPORATION

Leading Provider of Rugged Computing and Networking Systems Serving the Defense and Industrial Markets

Charlotte, N.C. – October 1, 2013 – Curtiss-Wright Controls, Inc. today announced that it has acquired 100% of the shares of Parvus Corporation (Parvus), a business unit of Eurotech S.p.A., for \$38 million in cash. Parvus is a leading designer and manufacturer of rugged small form factor computers and communications subsystems for the aerospace, defense, homeland security and industrial markets. The acquired business will operate within Curtiss-Wright's Controls segment.

"The Parvus team has established a leadership position in Commercial Off-The-Shelf (COTS)-based small form factor processors and networking subsystem solutions. This extends Curtiss-Wright's capabilities and fills two gaps in our product portfolio to help drive continued growth in our core aerospace, defense and homeland security markets," said Tom Quinly, President of Curtiss-Wright Controls.

Founded in 1983, Parvus is a recognized leader in the design and manufacture of open standard-based modules and systems for C4ISR (Command, Control, Communications, Computers, Intelligence, Surveillance and Reconnaissance) applications in the defense market and various applications in the aerospace, homeland security and general industrial markets. The company's SWaP-optimized solutions, including Rugged Processor Systems, Mobile Networking Subsystems and Industrial Grade Board-Level PC/104 Modules, are used in critical defense applications such as unmanned systems and tactical C4ISR payloads. Product applications for the industrial markets include system monitoring, diagnostics, communications, networking and avionics subsystem control, most notably to commercial transportation customers. Their capabilities include rapid turnkey subsystems integration and development services, and the design of complete embedded computer systems tailored to meet specific customer requirements through the use of off-the-shelf building blocks and technical expertise. Parvus, headquartered in Salt Lake City, Utah, has approximately 50 employees and is expected to generate sales of approximately \$23 million in 2013.

This press release contains forward-looking statements made pursuant to the Safe Harbor provisions of the Private Securities Litigation Reform Act of 1995 that are based on management's beliefs and assumptions. Such statements, including statements relating to Curtiss-Wright Corporation's expectations for the future performance of Parvus, the future opportunities associated with the acquisition, and the success of the Company integrating Parvus into its Controls segment, are not considered historical facts and are considered forward-looking statements under the federal securities laws. Such forward-looking statements are subject to certain risks and uncertainties that could cause actual results to differ materially from those expressed or implied. Readers are cautioned not to place undue reliance on these forward-looking statements, which speak only as of the date hereof. Such risks and uncertainties include, but are not limited to: a reduction in anticipated orders; an economic downturn; changes in competitive marketplace and/or customer requirements; a change in US government spending; an inability to perform customer contracts at anticipated cost levels; and other factors that generally affect the business of aerospace, defense contracting, marine, electronics and industrial companies. Please refer to the Company's current SEC filings under the Securities Exchange Act of 1934, as amended, for further information.
